Art Unit: 1724

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description:

"37" as in Fig. 5.

A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 4-5 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 4-5 fail to further limit the positive structure of the gas liquid contact plate and only recite functional process language. It is suggested that the claims be rewritten as positive method claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1724

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Priestly(US Patent No. 3,466,019).

Priestly teaches a gas-liquid contactor(9) of parallel rows(15) of contact plates, the contact plates having a plurality of straight rows(Fig. 2), each row having repeated irregularities(D,E,F,C) and flat portions(1) wherein adjacent rows have repeated wavy irregularities out of phase with an equal period of an adjacent row forming an opening(G) between the rows. In claims 4-5 the phrases "and a liquid supplied..." and "wherein the gas...", respectively; have been considered as functional intended usage of the apparatus and have accordingly not been given any patentable weight, see MPEP 2114 and 2115 for further reference.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art references listed on Notice of References Cited (PTO-892) are considered to be of interest disclosing similar gas-liquid contact plates.
